Advanced Training
JABSOM’s Hawai‘i Residency Programs, JABSOM and its teaching hospital partners train new MDs in 16 programs at The Queen’s Medical Center, Hawai‘i Pacific Health’s Kapi‘olani, Wilcox and Straub Medical Centers, Kuakini Medical Center, Tripler/Veterans Administration, Castle Medical Center and Kaiser Permanente, plus community health centers statewide.

Hawai‘i & Pacific Emphasis
JABSOM’s Pacific island location has encouraged research in Native Hawaiian Health, Cross-Cultural Psychiatry, Complementary and Alternative Medicine, Health Disparities and the Infectious Diseases of Asia and the Pacific.

At left, images of medicinal plants used by Native Hawaiian healers are etched onto our windows.

See our UH Med Now news blog, twitter feed @uhmed, Flickr Images, Instagram and more at http://jabsom.hawaii.edu

Our faculty and student researchers also publish scholarly work in the monthly Hawai‘i Journal of Medicine and Public Health at www.hjmph.org

For more information about JABSOM, contact us at (808) 692-0881 (Dean’s Office) Or contact Elaine Evans, Development Director at (808) 692-0991 or Tina Shelton, Director of Communications, Media and Government Affairs at (808) 692-0897.

Our vision is ALOHA: Attaining Lasting Optimal Health for All

Jerris R. Hedges, MD
Professor and Dean
Barry and Virginia Weinman Endowed Chair

Part of the University of Hawai‘i at Mānoa, but located at a health sciences campus in Kaka‘ako, at 651 Ilalo Street
**Legacy: MDs and more**
Half of the active physicians in our state are graduates of JABSOM, the Hawai`i Residency Programs, Inc. and/or serve on our faculty while treating patients. We are by far the major provider of doctors serving the state of Hawai`i.

JABSOM also proudly trains post-MDs, and confers graduate degrees in the Biomedical Sciences, Clinical Research, Epidemiology, Communication Sciences & Disorders and a B.S. in Medical Technology.

**Kaka`ako Facilities**
The Hawai`i State approved use of the tobacco “Master Settlement Agreement” funds to build and help operate our oceanfront campus. The site, chosen by Governor Ben Cayetano, opened in 2005. We proudly educate our students and the people of Hawai`i about the dangers of smoking and we treat those suffering from tobacco-related disease. Our Medical Education Building features a Center for Clinical Skills, the SimTiki Center, our high-tech human patient simulation center, and a 150-seat auditorium. **The UH Cancer Center is also on campus.**

**Growing the economy and creating higher-than-average paying jobs**
JABSOM attracts medical research funding which exceeds $40 million annually.

**MD Student Learning**
We admit 68 MD students per class – nearly 90% of our students are from Hawai`i. In addition to the overall 266 medical students, we train another 225 post-MD residents and fellows--MDs who are employed and serving in health settings in Hawai`i under the supervision of JABSOM faculty while they work toward licensure and board certification.

Our MD program uses a Problem-Based Learning (PBL) curriculum. Students are in contact with patients from the beginning of their study through graduation. They also learn within communities statewide, and take part in service learning, including assisting residents of O`ahu’s homeless shelters. For 10 years in a row (up to 2014), our students scored above the national average in the US Medical Licensing Exam, Step 1.
