Active Shooter

• Example: It’s a weekday morning and classes are in session.
• Just after 9:00 am, occupants are alerted to the sound of gunshots and screaming coming from the 2nd floor of the Medical Education Building.
Employee and Student Response Options to Consider:

RUN

HIDE

FIGHT
RUN

If there is an accessible escape path, attempt to evacuate the premises. Be sure to:

• Have an escape route and plan in mind
• Evacuate regardless of whether others agree to follow
• Leave your belongings behind
• Help others escape, if possible
• Prevent individuals from entering an area where the active shooter may be
• Keep your hands visible
• Follow the instructions of any police or security officers
• Do not attempt to move wounded people
• Call 911 when you are safe
HIDE

If evacuation is not possible, find a place to hide where the active shooter is less likely to find you.

Your hiding place should:
• Be out of the active shooter's view
• Provide protection if shots are fired in your direction (i.e., an office with a closed and locked door)
• Not trap you or restrict your options for movement
• To prevent an active shooter from entering your hiding place:
  – Lock the door
  – Blockade the door with heavy furniture

If the active shooter is nearby:
• Lock the door
• Silence your cell phone and/or pager
• Turn off any source of noise (i.e., radios, televisions)
• Hide behind large items (i.e., cabinets, desks)
• Remain quiet
If evacuation and hiding out are not possible:

• Remain calm
• **Call 911**, if possible, to alert police to the active shooter's location
• If you cannot speak, leave the line open and allow the dispatcher to listen
FIGHT

As a last resort, and only when your life is in imminent danger, attempt to disrupt and/or incapacitate the active shooter by:

• Acting as aggressively as possible against him/her
• Throwing items and improvising weapons
• Yelling
• Committing to your actions
