Pathology, the study of disease, involves tissue examined by microscopy, called anatomic pathology, and various bodily fluids and samples examined by clinical instruments, called clinical pathology. Pathology is both a foundational science and a clinical service, which is reflected in the research interests of its faculty.
Research Interests

Queen’s Medical Center
  Dr. Chris Lum – dermatopathology; molecular pathology
  Dr. Koah Vierkoetter – breast pathology

Kapi’olani Medical Center
  Dr. Karen Thompson – pediatric pathology
  Dr. Jeffrey Killeen – breast pathology

Kaiser Medical Center
  Dr. Stacy Honda – clinical pathology
  Dr. Brock Kaya – neuropathology

University of Hawaii Cancer Center
  Dr. Brenda Hernandez – Cancer pathogenesis in minority groups

If you are interested in research, contact: Dr. David Horio, dhorio@hawaii.edu
